Subject: Questions of potential tenderers

Town of Lipik received several questions concerning the public procurement for Construction of Sewerage System and Wastewater Treatment Facility in Settlement Gaj, Publication reference: **3011111091/WKS:**

Questions:

1. Should we write prices in words: all as one word (eg. onehundredtwentyoneeuroandfifteencents) or each word separately (eg. one hundred twenty one euro and fifteen cents)?
2. What if there is not enough space for writing price in words. If the space provided for writing price in words is not enough and price is written in two rows, then the content of page is expanded to the next page. There is a lot of cases in the Price schedule like the one specified above. This could cause that the number of pages will not be the same as in the original document.
What to do in case mentioned above?
3. Item 1.1.1. in Price schedule is written 2 times. What should we do?
4. In Price schedule, You ask us to write price in words in EUR, but what about cents? For example, for **Price No 1.1.1.: per meter square:** *EUR*. How should we write price in words if there is some cents?
5. Item 1.3.2. in Price schedule have machine excavation and manual excavation. You ask to write only one price per cubic meter. But prices for machine excavation and manual excavation are different. What price should we write? The same question is for items 1.5.1., 1.6.1., 1.6.2. and all other items which have subitems with the different titles, what means that the prices are different and we have to write only one price.
6. Items 5.4.1., 8.5.1. and 11.13.1. in Price schedule and Bill of quantities have different titles. What title is correct?
7. Items 11.2.1. and 12.6.1. in Price schedule and Bill of quantities have different units. What unit is correct?
8. There are 2 items with Price N^o 11.11.3. in Price schedule, but there is no items with Price N^o 11.11.4. What is correct?
9. Please confirm that in our offer, we can write page numbers *consecutive only*.
e.g. 1, 2, 3,...
